

# High Speed Transistor Optocouplers

Single Channel:

HCPL0453, HCPL0500, HCPL0501

Dual Channel:

HCPL0531, HCPL0534

## HCPL0453, HCPL0500, HCPL0501, HCPL0531, HCPL0534

### Description

The HCPL05XX, and HCPL04XX optocouplers consist of an AlGaAs LED optically coupled to a high speed photo-detector transistor housed in a compact 8-pin small outline package.

A separate connection for the bias of the photodiode improves the speed by several orders of magnitude over conventional phototransistor optocouplers by reducing the base-collector capacitance of the input transistor. The HCPL04XX devices do not have the base bonded out to a lead for additional noise margin. The HCPL053X devices have two channels per package for optimum mounting density.

### Features

- High Speed – 1 MBit/s
- 15 kV/μs Minimum Common Mode Transient Immunity at  $V_{CM} = 1500\text{ V}$  (HCPL0453/0534)
- Open Collector Output
- Guaranteed Performance Over Temperature: 0°C to 70°C
- U.L. Recognized (File # E90700)
- VDE0884 Recognized (File # 136616)
  - ♦ Approval Pending for HCPL0531/0453
  - ♦ Ordering Option V, e.g., HCPL0500V
- BSI Recognized (File # 8661, 8662)
  - ♦ HCPL0500/0501 only

### Applications

- Line Receivers
- Pulse Transformer Replacement
- Output Interface to CMOS–LSTTL–TTL
- Wide Bandwidth Analog Coupling

### TRUTH TABLE (Positive Logic)

| LED | $V_o$ |
|-----|-------|
| ON  | LOW   |
| OFF | HIGH  |

SOIC8  
CASE 751DZ

### MARKING DIAGRAM

1. ON = onsemi Logo
2. 500 = Device Number
3. V = VDE mark indicates DIN EN/IEC60747–5–5 approval (Note: Only appears on parts ordered with VDE option – See Ordering Information Table)
4. X = One-Digit Year Code, e.g. '3'
5. YY = Two Digit Work Week Ranging from '01' to '53'
6. S = Assembly Package Code

### ORDERING INFORMATION

See detailed ordering and shipping information on page 8 of this data sheet.

# HCPL0453, HCPL0500, HCPL0501, HCPL0531, HCPL0534

**SAFETY AND INSULATION RATINGS** (As per DIN EN/IEC 60747-5-5, this optocoupler is suitable for “safe electrical insulation” only within the safety limit data. Compliance with the safety ratings shall be ensured by means of protective circuits.)

| Parameter                                                                           |                       | Characteristics |
|-------------------------------------------------------------------------------------|-----------------------|-----------------|
| Installation Classifications per DIN VDE 0110/1.89 Table 1, For Rated Mains Voltage | <150 V <sub>RMS</sub> | I–IV            |
|                                                                                     | <300 V <sub>RMS</sub> | I–III           |
| Climatic Classification                                                             |                       | 55/100/21       |
| Pollution Degree (DIN VDE 0110/1.89)                                                |                       | 2               |
| Comparative Tracking Index                                                          |                       | 175             |

| Symbol                | Parameter                                                                                                                                                      | Value            | Unit              |

### ISOLATION CHARACTERISTICS

| Symbol    | Characteristics                | Test Conditions                                                                               | Min.      | Typ.* | Max. | Unit                      |
|-----------|--------------------------------|-----------------------------------------------------------------------------------------------|-----------|-------|------|---------------------------|
| $V_{ISO}$ | Input-Output Isolation Voltage | $f = 60\text{ Hz}$ , $t = 1.0\text{ min.}$ , $I_{I-O} \leq 2\text{ }\mu\text{A}$ (Notes 6, 7) | 2500      |       |      | $\text{V}_{AC\text{RMS}}$ |
| $R_{ISO}$ | Isolation Resistance           | $V_{I-O} = 500\text{ V}$ (Note 6)                                                             | $10^{11}$ |       |      |                           |
| $C_{ISO}$ | Isolation Capacitance          | $V_{I-O} = 0\text{ V}$ , $f = 1.0\text{ MHz}$ (Note 6)                                        |           | 0.2   |      | $\text{pF}$               |

Product parametric performance is indicated in the Electrical Characteristics for the listed test conditions, unless otherwise noted. Product performance may not be indicated by the Electrical Characteristics if operated under different conditions.

\*All typicals at  $T_A = 25^\circ\text{C}$

- Current Transfer Ratio is designed as a ratio of output collector current,  $I_O$ , to the forward LED input current,  $I_F$ , times 100%.
- The  $4.1\text{ k}\Omega$  load represents 1 LSTTL unit load of  $0.36\text{ mA}$  and  $6.1\text{ k}\Omega$  pull-up resistor.
- The  $1.9\text{ k}\Omega$  load represents 1 TTL unit load of  $1.6\text{ mA}$  and  $5.6\text{ k}\Omega$  pull-up resistor.
- Common mode transient immunity in logic high level is the maximum tolerable (positive)  $dV_{cm}/dt$  on the leading edge of the common mode pulse signal  $V_{CM}$ , to assure that the output will remain in a logic high state (i.e.,  $V_O > 2.0\text{ V}$ ). Common mode transient immunity in logic low level is the maximum tolerable (negative)  $dV_{cm}/dt$  on the trailing edge of the common mode pulse signal,  $V_{CM}$ , to assure that the output will remain in a logic low state (i.e.,  $V_O < 0.8\text{ V}$ ).
- Device is considered a two terminal device: Pins 1, 2, 3 and 4 are shorted together and Pins 5, 6, 7 and 8 are shorted together.
- 2500 VAC RMS for 1 minute duration is equivalent to 3000 VAC RMS for 1 second duration.

onsemi and onsemi are trademarks of Semiconductor Components Industries, LLC dba onsemi or its subsidiaries in the United States and/or other countries. onsemi reserves the right to make changes without further notice to any products herein. onsemi makes no warranty, representation or guarantee regarding the suitability of its products for any particular purpose, nor does onsemi assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation special, consequential or incidental damages. onsemi does not convey any license under its patent rights nor the rights of others.

**onsemi**, **Onsemi**, and other names, marks, and brands are registered and/or common law trademarks of Semiconductor Components Industries, LLC dba "**onsemi**" or its affiliates and/or subsidiaries in the United States and/or other countries. **onsemi** owns the rights to a number of patents, trademarks, copyrights, trade secrets, and other intellectual property. A listing of **onsemi**'s product/patent coverage may be accessed at [www.onsemi.com/site/pdf/Patent-Marking.pdf](http://www.onsemi.com/site/pdf/Patent-Marking.pdf). **onsemi** reserves the right to make changes at any time to any products or information herein, without notice. The information herein is provided "as-is" and **onsemi** makes no warranty, representation or guarantee regarding the accuracy of the information, product features, availability, functionality, or suitability of its products for any particular purpose, nor does **onsemi** assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation special, consequential or incidental damages. Buyer is responsible for its products and applications using **onsemi** products, including compliance with all laws, regulations and safety requirements or standards, regardless of any support or applications information provided by **onsemi**. "Typical" parameters which may be provided in **onsemi** data sheets and/or specifications can and do vary in different applications and actual performance may vary over time. All operating parameters, including "Typicals" must be validated for each customer application by customer's technical experts. **onsemi** does not convey any license under any of its intellectual property rights nor the rights of others. **onsemi** products are not designed, intended, or authorized for use as a critical component in life support systems or any FDA Class 3 medical devices or medical devices with a same or similar classification in a foreign jurisdiction or any devices intended for implantation in the human body. Should Buyer purchase or use **onsemi** products for any such unintended or unauthorized application, Buyer shall indemnify and hold **onsemi** and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that **onsemi** was negligent regarding the design or manufacture of the part. **onsemi** is an Equal Opportunity/Affirmative Action Employer. This literature is subject to all applicable copyright laws and is not for resale in any manner.
