3.3 V/5 V ECL JK Flip-Flop

MC100EP35

Description

The MC100EP35 is a higher speed/low voltage version of the EL35 JK flip-flop. The J/K data enters the master portion of the flip-flop when the clock is LOW and is transferred to the slave, and thus the outputs, upon a positive transition of the clock. The reset pin is asynchronous and is activated with a logic HIGH.

The 100 Series contains temperature compensation.
