The diagram shows a switching circuit. A pulse voltage source V_{GS} is connected through a resistor R_G to the gate of a MOSFET labeled "Driver". The driver MOSFET's source is grounded, and its drain is connected to the gate of a second MOSFET labeled "DUT". The "DUT" MOSFET's source is also grounded, and its drain is connected to a load consisting of an inductor L in series with a DC supply V_{DD} . The current through the inductor is labeled I_{SD} . The voltage across the DUT MOSFET is labeled V_{SD} . The output terminals are marked with "+" and "-" signs.
