Product parametric performance is indicated in the Electrical Characteristics for the listed test conditions, unless otherwise noted. Product performance may not be indicated by the Electrical Characteristics if operated under different conditions.

NOTES:

- Switching characteristics are independent of operating junction temperatures.
 R_{θJA} is determined with the device mounted on a 1 in² pad 2 oz copper pad on a 1.5 x 1.5 in. board of FR-4 material. R_{θCA} is determined by the user's board design.

a) 50°C/W when mounted on a 1 in² pad of 2 oz copper.

b) 125°C/W when mounted on a minimum pad of 2 oz copper.
