

500 W Gaming Power PSU Evaluation Board User's Manual

EVBUM2875/D

SPECIFICATION

onsemi's Device	Application	Input Voltage	Output Power	Topology
NCP1681DR2G NCP13994AXDR2G NCP4318BLC	Gaming PSU	90–264 Vac	500 W	CCM/DCM multi-mode totem pole PFC Half bridge LLC

	Output Specification
Output Voltage	12.8 V
Nominal Current	39 A

Avg. Efficiency	>93.5% @ 12.8 V 39 A at board end, 115 & 230 Vac
Ripple	<200 mV
Standby Power	< 300 mW @ 12 V & 230 Vac (No cable plug in)
Power Density	1 W/cm ³ ; 16 W/inch ³
Protection	Bulk UVP, OVP, SCP, OTP
Size	183 mm x 93 mm x 30 mm

Overview

This demo board uses NCP1681 CCM multi-mode PFC controller, latest current mode LLC controller NCP13994, and NCP4318 SR controller for low profile and small dimension design, enabling high power density PSU without FAN cooling.

The NCP1681 is a PFC controller IC designed to drive the bridgeless totem pole PFC topology. The bridgeless totem pole PFC is a power factor correction architecture that consists of a fast leg driven at the PWM switching frequency and slow leg that operates at the AC line frequency. This topology eliminates the diode bridge and significant improvement in the power stage efficiency, especially at low line. The controller can be configured to operate in continuous conduction mode (CCM) or multi-mode (CrM-CCM) operation.

The NCP13994 is a high performance current mode controller for half bridge resonant converters. This controller implements 700 V gate drivers, simplifying

layout and reducing external component count. The built-in Brown-Out input function eases implementation of the controller in all applications. In applications where a PFC front stage is needed, the NCP13994 features a dedicated output to drive the PFC controller. This feature together with quiet skip mode technique further improves light load efficiency of the whole application.

NCP4318 is an advanced Synchronous Rectification (SR) controller for LLC resonant converter with minimum external components. It has two driver stages for driving the SR MOSFETs which are rectifying the outputs of the secondary transformer windings. The two gate driver stages have their own Drain and Source sensing inputs and operate independently of each other. The advanced adaptive dead time control compensates parasitic inductance voltage to minimize the body diode conduction and maximize the efficiency. The advanced turn-off control algorithm allows stable SR operation over entire load range.

Key Features

- Universal AC input range (90–264 Vac)
- No-Load Power Consumption < 300 mW
- Avg. Efficiency: >93.5% @ 12.8 V/ 39 A at board end, 115 & 230 Vac
- Full Load Efficiency 93.9 % @ 115 Vac; 95.4 % @ 230 Vac
- High power density: 1 W/cm³; 16 W/ inch³ without FAN cooling
- Protection: OVP, OCP, SCP, Bulk UVP
- PFC stage: NCP1681 for multi-mode totem pole PFC
- FCCrM to improve load range efficiency
- Frequency fold back to improve light load efficiency
- Fast Line/Load transient compensation
- Dedicate pin PFCok to inform LLC startup
- Totem pole PFC to implement best PFC efficiency
- No STDBY or AUX Power Stage
- LLC stage: NCP13994 implements current mode with fast response
- Automatic Dead Time, and Dead Time maximum clamp
- Light load mode to improve efficiency
- Quiet skip mode to improve Acoustic noise
- Normal operating VPFC keeps 395 V, and No load trigger green mode then VPFC hiccup between 395 V to 410 V
- Board size: 183 mm x 93 mm x 30 mm

38	UltraFast Power Rectifier 1 A/200 V	SMA	onsemi	ES1D	3	D8, D10, D23

Table 2. BOM (continued)

	Description	Package	Vendor	Vendor P/N	QPA	Parts
39	UltraFast Power Rectifier 3 A/200 V	SMC	onsemi	ES3B	1	D22
40	Dual Switching Diode 100 mA/ 35 V	SOT-23	onsemi	MMBD2835LT1G	1	D12
41	Diode Zener 4.7 V	SOD-123	onsemi	MMSZ5230BT1G	1	ZD1
42	Diode Zener 16 V	SOD-123	onsemi	MMSZ5246BT1G	1	ZD6
43	Dual PMOS -80 V, -2.1 A, 183 mΩ	SO8	onsemi	FDS8935	2	U2, U3 (PLM0438-6 daughter card)
44	Totem pole PFC controller	SO20	onsemi	NCP1681	1	U10
45	LLC controller	SO16	onsemi	NCP13994	1	U4 (PLM0438-5 daughter card)
46	Programmable Precision Reference	SOT-23	onsemi	NCP432BVSNT1G	2	U6, U7
47	Photo Coupler	DIP4	onsemi	FOD817B	2	U8, U11
48	Dual Driver SR controller	SO8	onsemi	NCP4318BLCDR2G	2	U5, U9 (PLM0438-2 daughter card)
49	Driver GaN 50 mΩ 600 V	QFN26	onsemi	NCP58921	2	U14, U15 (PLM0438-6 daughter card)
50	High low side Driver	SO8	onsemi	NCP5183	1	U12 (PLM0438-3 daughter card)
51	Isolated high low side gate driver	SO16 WB	onsemi	NCP51561	1	U16
52	LDO Regulator, 150 mA, 38 V	TSOP5	onsemi	NCP730ASNADJT1G	1	U13
53	Differential choke 27 μH				2	L1, L3 (TBD)
54	Common mode choke 1 mH	L27 x W14.5 mm _ 1 φ x 2 pin pitch 10 mm	台灣電感		1	L2
55	Differential choke 10 μH	L 24 x W14 x H20 mm _ 1.5 φ x 3 pin pitch 11 mm	台灣電感		1	L7
56	PFC choke 280 μH	QP3925V	YUJING	11054-125v400210	1	L4
57	LLC leakage inductor 55 μH	RM10	WE	750344733	1	L6
58	LLC main transformer 280 μH	PQ3220	WE	750344731	2	TX1, TX2
59	SMT Current Sense Transformer	749251050	WE	749251050	2	CT1, CT2 (PLM0438-6 daughter card)
