GRI 102: General Disclosures 2017			
102-1	Name of organization	ON Semiconductor Corporation	
102-2	Activities, brands, products and services	<p>Activities: ON Semiconductor (NASDAQ: ON) is a publicly traded global semiconductor company headquartered in Phoenix, Arizona. We drive energy efficient innovations, empowering customers to reduce global energy use. The company is a leading supplier of semiconductor-based solutions, offering a comprehensive portfolio of energy efficient power management, analog, sensors, logic, timing, connectivity, discrete, SoC and custom devices. The company's products help engineers solve their unique design challenges in automotive, communications, computing, consumer, industrial, medical, aerospace and defense applications. ON Semiconductor operates a responsive, reliable, world-class supply chain and quality program, a robust compliance and ethics program and a network of manufacturing facilities, sales offices and design centers in key markets throughout North America, Europe and the Asia Pacific regions.</p> <p>Products: Standard products include Electrically Erasable Programmable Read-Only Memory (EEPROM), Static random-access memory (SRAM), bipolar transistors, insulated-gate bipolar transistor (IGBTs), thyristors, diodes, junction gate field-effect transistors (JFETs), protection, rectifiers, amplifiers, filters, metal-oxide-semiconductor field-effect transistor (MOSFETs), standard logic, linear regulators.</p>	
102-3	Location of headquarters	Phoenix, AZ, USA	
102-4	Location of operations	<p>Manufacturing: Belgium, Canada, China, Czech Republic, Japan, Malaysia, Philippines, South Korea, United States, Vietnam</p> <p>Design Centers: Belgium, Canada, Czech Republic, France, Germany, India, Ireland, Japan, Korea, Philippines, Romania, Slovak Republic, Switzerland, Taiwan, United States</p> <p>Solution Engineering Centers: China, Germany, Japan, South Korea, Taiwan, United States</p>	
102-5	Ownership and legal form	Public corporation	
102-6	Markets served	<p>Sectors: Automotive, consumer, computing, communications, networking, industrial, medical, aerospace and defense</p> <p>Customers: Original equipment manufacturers, distributors, electronic manufacturing service providers</p>	
102-7	Scale of organization	<p>Number of employees: approximately 34,000 globally</p> <p>Number of operations: 51</p> <p>Net revenue: \$5,543.1 million</p> <p>Total capitalization: total liabilities –\$4,394.1 million; total equity – \$2,801.0 million</p> <p>Quantity of products and services: 72.8 billion units shipped in 2017</p>	Number of operations equals solution engineering, design, manufacturing and support sites with 50+ employees
102-8	Information on employees and other workers (a) Total number of employees by employment contract and gender	<p>Contractors and interns: M – 617; F – 367</p> <p>Regular employees: M –17,795; F – 15,713</p>	All data is as of December 31, 2017.
	(b) Total number of employees by employment contract and region	<p>Contractors and interns: Americas: 105 Asia: 847 EMEA: 32</p> <p>Regular employees: Americas: 4,582 Asia: 25,117 EMEA: 3,809</p>	
	(c) Total number of permanent employees by employment type and gender	<p>Full time: M – 18,333; F – 16,018</p> <p>Part time: M – 79; F – 62</p>	

GRI Standard	Disclosure	Cross reference or Answer	Additional Notes
	(d) Report whether a substantial portion of the organization's workforce is performed by workers who are legally recognized as self-employed, or by individuals other than employees or supervised workers, including employees and supervised employees by contractors.	No	
	(e) Report any significant variations in employee numbers	N/A	
102-9	Description of supply chain	ON Semiconductor's supply chain has a multifaceted supply structure of direct materials suppliers, foundry and subcontractor providers, indirect material suppliers and professional service providers deployed across a global sourcing and procurement organization. In 2017 the company worked with over 8,000 suppliers and service providers in North America, Asia Pacific, Europe and the Middle East of which approximately 4,600 were production-related. The various categories of suppliers are managed through both centralized strategic sourcing organizations and site procurement teams.	
102-10	Significant changes to organization and supply chain	N/A	
102-11	Precautionary principle approach	ON Semiconductor has an enterprise risk management (ERM) program which addresses the precautionary principle. The goal of the company's ERM program is to systematically, consistently and effectively identify, evaluate, prioritize, and manage key risks affecting the company. To learn more about ON Semiconductor's ERM program, please refer to page 11 of the company's 2017 Corporate Social Responsibility Report .

GRI Standard	Disclosure	Cross reference or Answer	Additional Notes
102-14	Statement from senior decision-maker	See a letter from ON Semiconductor's President and CEO on page 1 of the company's 2017 Corporate Social Responsibility Report . For further details on impacts, risks and opportunities please see the company's 2017 SEC Form 10-K .	
102-16	Description of organization's values, principles, standards, and norms of behavior	<p>ON Semiconductor's Code of Business Conduct outlines the company's values, principles, standards and norms of behavior. It is reviewed annually and all employees and board of directors must read and sign the Code of Business Conduct on an annual basis. Within ON Semiconductor's Code of Business Conduct is information on the company's core values:</p> <ul style="list-style-type: none"> • Respect: We treat each other with dignity and respect. We share information and encourage different views in an open and honest environment. We draw out the best in each other, recognizing that diversity of backgrounds and experience are key strengths. We all win when we support each other. • Integrity: We mean what we say and say what we mean. Our Company has set high standards for our products and individual conduct. Our reputation depends on the highest standards of ethical behavior. We are accountable for delivering out commitments on time with highest quality. We address issues objectively, using facts and constructive feedback in a work atmosphere where we do not fear open discussion or questions. When a decision has been made, we work to support it. We comply with all legal requirements and hold ourselves to the highest standards of ethical conduct. • Initiative: We value people who demonstrate a positive, "can-do" attitude, while collaborating to win. We work intelligently, with a sense of urgency, while always maintaining our commitment to comply with applicable laws, regulations and standards. If a problem exists, we see it through to rapid resolution while acting in an ethical manner. Each of us is expected to demonstrate these core values in our roles at ON Semiconductor. These values apply equally to us all – employees and directors alike. <p>Please see ON Semiconductor's CSR Statement of Commitment for information on the company's sustainability-related principles.</p>	
102-18	Governance structure	<p>Governance structure: Board of Directors Board of Director Committees: Audit Committee, Compensation Committee, Corporate Governance and Nominating Committee, Executive Committee, Integration and Oversight Committee and Science and Technology Committee Committee responsible for decision making on environmental and social impacts: Audit Committee; Corporate Social Responsibility Steering Committee</p>	
102-40	List of key stakeholder groups	Employees, customers, suppliers, governments, non-government and non-profit organizations, communities and investors.	
102-41	Percentage of employees covered by collective bargaining agreements	22.4% globally	
102-42 – 102-43	Identifying and selecting stakeholders; Approach to stakeholder engagement	ON Semiconductor believes that the views of its stakeholders are important in making operational and strategic decisions. The company identifies stakeholders that either have a significant impact on or are significantly impacted by ON Semiconductor's operations. The method and frequency of engagement varies by stakeholder type. However, the company aims to engage stakeholders through conferences, membership and associations, surveys, reporting, scorecards, assessments, philanthropy, employee volunteerism and social media throughout the year. Further detail on how the company engages its stakeholders can be found on page 52 of the company's 2017 Corporate Social Responsibility Report .	

GRI Standard	Disclosure	Cross reference or Answer	Additional Notes
102-44	Key topics and concerns raised	To see key topics raised and issues considered most important by our stakeholders and company, please see pages 52 of the company's 2017 Corporate Social Responsibility Report .	
102-45	Entities included in the consolidated financial statements	See Item 1 Business overview and Exhibit 21.1 of 2017 SEC Form 10-K	
102-46	Defining report content and topic boundaries	See Report Overview on page 3 of the company's 2017 Corporate Social Responsibility Report .	
102-47	List of material topics	See Material Topics on page 53 of the company's 2017 Corporate Social Responsibility Report .	
102-48	Restatements of information	None	
102-49	Changes in reporting	None	
102-50	Reporting period	2017	
102-51	Date of most recent report	July, 2017	
102-52	Reporting cycle	Annual	
102-53	Contact point for questions	Keenan Evans, Senior Vice President, Corporate Social Responsibility	
102-54	Claims of reporting in accordance with the GRI Standards	This report has been prepared in accordance with GRI Standards: Core option.	
102-55	GRI Content Index	See page 56 of the company's 2017 Corporate Social Responsibility Report .	
102-56	External assurance	ON Semiconductor has not sought external assurance for the contents included in the company's 2017 Corporate Social Responsibility Report and GRI Content Index. However, certain data included is subject to external review and all information provided is reviewed internally.	
GRI 103: Management Approach 2017			
103-1	Explanation of material topic and its boundary	See Material Topics and Aspect Boundaries on pages 52 – 54 of the company's 2017 Corporate Social Responsibility Report .	
103-2	Management approach for material topics	For management approach on our material topics, please see the company's 2017 Corporate Social Responsibility Report .	
103-3	Evaluation of management approach	For evaluation of management approach, please see the company's 2017 Corporate Social Responsibility Report .	
GRI 201: Economic Performance 2017			
201-1	Direct economic value generated and distributed (EVG&D)	Revenue: \$5,543.1 million Proceeds from sale of assets: \$14.3 million	
	(a) Direct economic value generated		
	(b) Economic value distributed	Cost of revenue: \$3,509.3 million Operating cost: \$1,352.9 million Cash paid for employee wages and benefits: N/A Cash paid for interest: \$92.1 million Cash paid for taxes: \$67.8 million	ON Semiconductor does not publicly disclose cash paid for employee wages and benefits.
	(c) Economic value retained	Net income: \$820.3 million	
	(d) EVG&D by country, regional, or market levels	See 2017 SEC Form 10-K – Segment Information	
201-2	Financial implications and other risks and opportunities due to climate change	To learn about ON Semiconductor's approach to climate change, please see page 40 of the company's 2017 Corporate Social Responsibility Report .	
201-3	Defined benefit obligation plans and other retirement plans	See ON Semiconductor's website for Regional Benefits Summaries and 2017 SEC Form 10-K .	
201-4	Financial assistance received from government	N/A	ON Semiconductor does not publicly disclose this information.

GRI Standard	Disclosure	Cross reference or Answer	Additional Notes
GRI 202: Market Presence 2017			
202-1	(a) Ratio of standard entry level wage by gender compared to local minimum wage	All ON Semiconductor employees are compensated at or above minimum wage. Minimum wage in all listed regions is gender neutral.	
	(b) When a significant proportion of other workers (excluding employees) performing the organization's activities are compensated based on wages subject to minimum wage rules, describe the actions taken to determine whether these workers are paid above minimum wage.	"Other workers" in this case pertain to employees of ON Semiconductor suppliers or on-site service providers (e.g. janitorial staff, cafeteria workers, security, etc.). The company conducts risk assessments and/or on-site verification of suppliers and on-site service providers to ensure that RBA standards and legal requirements are being met, including those related to minimum wage.	
	(c) Definition used for 'significant locations of operation'.	Manufacturing locations	
202-2	(a) Proportion of senior management hired from the local community	72%	Senior management is site leader. Local means the country in which site is located.
	(b) Definition used for 'significant locations of operation'.	Manufacturing locations	
GRI 204: Procurement Practices 2017			
204-1	Proportion of spending on local suppliers	Asia: 90%; Americas: 92%; EMEA: 77%	
GRI 205: Anti-corruption 2017			
205-1	Operations assessed for risks related to corruption (a) Total number and percentage of operations assessed for risks related to corruption	Outside of RBA responsibilities, ON Semiconductor assesses other risks related to the company's operations. All manufacturing locations (100%) were initially considered when risk was assessed, and risks are assessed on an ongoing basis. The company sells its products around the world, and the risk assessment was based on types and locations of customers.	
	(b) Significant risks related to corruption identified through risk assessment	While there are no significant risks that were identified, some areas presented a greater risk than other areas. In assessing the risks related to corruption, a major factor is the ranking of the country in which the factory is located according to the Transparency International Corruption Perceptions Index. For the 10 countries in which we have factories, two countries were in the lower half of the 2017 country rankings – the Philippines (ranked 114) and Vietnam (ranked 113). Additionally, we have a greater risk with customers in China (ranked 80) because a number of electronics manufacturers are state owned enterprises and their employees are considered government officials under the U.S. Foreign Corrupt Practices Act.	
205-2	Communication and training about anti-corruption policies and procedures (a) Total number and percentage of governance body members that the organization's anti-corruption policies and procedures have been communicated	Nine (100%) board members, all of whom are in the United States, Europe or Asia Pacific received communication on the company's anti-corruption policy.	
	(b) Total number and percentage of employees that the organization's anti-corruption policies and procedures have been communicated to, broken down by employee category and region.	100% of our employees globally (Asia: 22,540; North America: 4,407; EMEA: 3,208) received communication on the company's anti-corruption policy through annual Code of Business Conduct rollout and training in 2017. Additionally, 10,461 employees (Asia: 5,629; North America: 2,930; EMEA: 1,902), making up 30% of our organization, received specialized training on anti-corruption in 2017. Targeted training is provided to compliance and ethics liaisons, EHS, facilities, finance, sales and marketing, supply chain, human resources, legal and security professionals.	

GRI Standard	Disclosure	Cross reference or Answer	Additional Notes
	(c) Total number and percentage of business partners that the organization's anti-corruption policies and procedures have been communicated to, broken down by type of business partner and region. Describe if the organization's anti-corruption policies and procedures have been communicated to any other persons or organizations.	ON Semiconductor does not maintain a database of business partners who have received information regarding the policies. The policies are included as a regular part of the company's contracts with distributors and suppliers working on its behalf.	
	(d) Total number and percentage of governance body members that have received training on anti-corruption, broken down by region.	Nine (100%) board members, all of whom are in the United States, Europe or Asia Pacific are provided training on the company's Code of Business Conduct, which includes a component on anti-corruption.	
	(e) Total number and percentage of employees that have received training on anti-corruption, broken down by employee category and region.	100% of our employees globally (Asia: 22,540; North America; 4,407; EMEA: 3,208) received communication on the company's anti-corruption policy through annual Code of Business Conduct rollout and training in 2017. Additionally, 10,461 employees (Asia: 5,629; North America: 2,930; EMEA: 1,902), making up 30% of our organization, received specialized training on anti-corruption in 2017. Targeted training is provided to compliance and ethics liaisons, EHS, facilities, finance, sales and marketing, supply chain, human resources, legal and security professionals.	
205-3	Confirmed incidents of corruption and actions taken	ON Semiconductor does not have knowledge of any confirmed incidents of corruption.	
GRI 206: Anti-Competitive Behavior 2017			
206-1	Legal actions for anti-competitive behavior, anti-trust or monopoly practices	ON Semiconductor does not have knowledge of any legal actions pending or completed during the reporting period regarding anticompetitive behavior and violations of anti-trust and monopoly legislation in which the organization has been identified as a participant.	
GRI 301: Material 2017			
301-1	Materials used by weight or volume	N/A	ON Semiconductor spends over \$1 billion on various parts and raw materials as the company manufactures both at internal and external sites. ON Semiconductor does not track or estimate the raw material used in key manufacturing locations.
301-2	Percentage of recycled input materials used to manufacturing organization's primary products and services	N/A	
301-3	Reclaimed products and their packaging materials	ON Semiconductor's take-back and recycle program provides customers with an environmentally responsible solution for the return, recycling and disposal of their products, including evaluation printed circuit boards. This program is designed to ensure compliance with the current and forthcoming regional regulations involving producer responsibility for recycling and proper disposal of electronic waste products.	
GRI 302: Energy 2017			
302-1	(a) Total fuel consumption within the organization from non-renewable sources, including fuel types used	629,896 gigajoules	Total fuel consumption from non-renewable sources is tracked for manufacturing facilities. Includes natural gas and diesel.
	(b) Total fuel consumption within the organization from renewable sources, including fuel types used	N/A	
	(c) Electricity consumption	1,283,878,940 kWh	Heating, cooling and steam is not tracked.

GRI Standard	Disclosure	Cross reference or Answer	Additional Notes
	(d) Electricity, heating, cooling and steam sold	N/A	None sold
	(e) Total energy consumption within the organization	1,458,855,278 kWh (5,251,879 gigajoules)	Includes electricity, natural gas and diesel fuel consumption at manufacturing sites only.
	(f) Standards, methodologies, assumptions and/or calculation tools used	kWh rate per unit volume of fuel type	
	(g) Conversion factors used	U.S. Department of Energy	
302-2	Energy consumption outside the organization	N/A	Not evaluated
302-3	(a) Energy intensity ratio for organization	Wafer fab energy (electricity & fuel) normalization = 0.067 kWh per unit Assembly & test energy (electricity & fuel) normalization = 1.414 kWh per KW Bonds.	Intensity ratio calculated separately for wafer fabs and for assembly & test operations.
	(b) Organization-specific metric (the denominator) chosen to calculate the ratio	Wafer fab normalization unit based on photo move volume. Assembly & Test normalization unit based on wire bond volume.	
	(c) Types of energy included in the intensity ratio; whether fuel, electricity, heating, cooling, steam, or all	Electricity and fuel.	
	(d) Whether the ratio uses energy consumption within the organization, outside of it, or both	Includes energy consumed within the organization.	
302-4	(a) Amount of reduction in energy consumption achieved as a direct result of conservation and efficiency initiatives	Wafer fabs: 14.0 % reduction compared to 2016 energy consumption (normalized) Assembly & Test: 8.6% reduction compared to 2016 energy consumption (normalized)	
	(b) Types of energy, included in the reductions	Electricity and fuel	
	(c) Basis for calculating reductions in energy consumption	Annual comparison	
	(d) Standards, methodologies, assumptions, and/or calculation tools used	kWh rate per unit volume of fuel type	
302-5	Reductions in energy requirements of product and services	N/A	
GRI 303: Water 2017			
303-1	(a) Water withdrawal by source	12,169,049,481 liters	Quantity not evaluated according to source.
	(b) Standards, methodologies and assumptions used	Direct measurement	
303-2	Water sources significantly affected by withdrawal of water	Water sources are not evaluated. ON Semiconductor's conservation projects reduced water consumption by 14% at our wafer fabs and 15% at our assembly and test sites compared to 2016.	
303-3	(a) Water recycled and reused	5,330,683,822 liters	
	(b) Total volume of water recycled and reused as a percentage of total water withdrawal	44%	
	(c) Standards, methodologies, and assumptions used	Recycled water excludes water used in continuous loop	
GRI 304: Biodiversity 2017			
304-1	Operational sites owned, leased, managed in, or adjacent to, protected areas and areas of high biodiversity value outside protected areas.	None	
304-2	Significant impacts of activities, products and services on biodiversity	N/A	
304-3	Habitats protected or restored	None	

GRI Standard	Disclosure	Cross reference or Answer	Additional Notes
GRI 305: Emissions 2017			
305-1	(a) Direct (Scope 1) GHG emissions	1,416,622 MTCO2	Emissions are tracked for manufacturing facilities, reported each quarter and compared to average quarterly consumption in the prior year. Calculation includes fuel and PFCs but does not include transportation.
	(b) Gases included in the calculation; whether CO2, CH4, N2O, HFCs, PFCs, SF6, NF3, or all.	CO2, N2O, NF3, CF4, CHF3, C3HF, C2F6, C4F8, C5F8, SF6	
	(c) Biogenic CO2 emissions in metric tons of CO2 equivalent.	N/A	
	(d) Base year for the calculation, if applicable, including:	2015	
	– The rationale for choosing it;	Annual comparison	
	– Emissions in the base year	1,235,385 MTCO2	
	– Context for any significant changes in emissions that triggered recalculations of base year emissions	Acquisition of Fairchild Semiconductor in September 2016	
	(e) Source of the emission factors and the global warming potential (GWP) rates used, or a reference to the GWP source.	IPCC methodology	
	(f) Consolidation approach for emissions; whether equity share, financial control, or operational control.	Operational control	
	(g) Standards, methodologies, assumptions, and/or calculation tools used.	IPCC methodology	
305-2	(a) Energy indirect (Scope 2) GHG emissions	649,589 MTCO2	Emissions are tracked for manufacturing facilities, compared to average quarterly consumption in the prior year and includes electricity purchased from utility.
	(b) If applicable, gross market-based energy indirect (Scope 2) GHG emissions in metric tons of CO2 equivalent.	N/A	
	(c) If available, the gases included in the calculation; whether CO2, CH4, N2O, HFCs, PFCs, SF6, NF3, or all.	Not available	
	(d) Base year for the calculation, if applicable, including:	2015	
	– The rationale for choosing it;	Annual comparison	
	– Emissions in the base year;	606,432 MTCO2	
	– The context for any significant changes in emissions that triggered recalculations of base year emissions	Acquisition of Fairchild Semiconductor in September 2016	
	(e) Source of the emission factors and the global warming potential (GWP) rates used, or a reference to the GWP source.	CO2 per kWh Electricity (gram) rate provided by utility source for each factory	
	(f) Consolidation approach for emissions; whether equity share, financial control, or operational control.	Operational control	
	(g) Standards, methodologies, assumptions, and/or calculation tools used.	CO2 per kWh Electricity (gram) rate provided by utility source for each factory.	

GRI Standard	Disclosure	Cross reference or Answer	Additional Notes
305-3	Other indirect (Scope 3) GHG emissions	N/A	ON Semiconductor does not regularly measure the environmental impact of scope 3 emissions. A study was conducted several years ago to measure the change in ON Semiconductor's carbon footprint as it related to changes the company made in their logistics network. It was found that as the company optimized their network to cut transportation cost there was a correlation to improving the company's carbon footprint.
305-4	(a) GHG emissions intensity	Wafer fab GHG emissions (electricity, fuel, PFCs) normalization = 37.592 grams carbon equivalent per unit Assembly & test energy (electricity, fuel, PFCs) normalization = 267.745 grams carbon equivalent per kW Bonds	Intensity ratio calculated separately for wafer fabs and for assembly & test operations.
	(b) Organization-specific metric (denominator) chosen to calculate ratio	Wafer fab normalization unit based on photo move volume. Assembly & test normalization unit based on wire bond volume.	
	(c) Types of GHG emissions included in the intensity ratio	Direct (Scope 1) and indirect (Scope 2)	
	(d) Gases included in the calculation; whether CO ₂ , CH ₄ , N ₂ O, HFCs, PFCs, SF ₆ , NF ₃ , or all.	CO ₂ , N ₂ O, NF ₃ , CF ₄ , CHF ₃ , C ₃ H ₈ , C ₂ F ₆ , C ₄ F ₈ , C ₅ F ₈ , SF ₆	
305-5	(a) Reduction of GHG emissions	67,675 metric tons of CO ₂ through 47 projects in 6 countries	
	(b) Gases included in the calculations; whether CO ₂ , CH ₄ , N ₂ O, HFCs, PFCs, SF ₆ , NF ₃ , or all.	N/A	
	(c) Base year or baseline, including the rationale for choosing it.	2015; Annual comparison	
	(d) Scopes in which reductions took place; whether direct (Scope 1), energy indirect (Scope 2), and/or other indirect (Scope 3).	Energy indirect (scope 2)	
	(e) Standards, methodologies, assumptions, and/or calculation tools used.	CO ₂ per kWh Electricity (gram) rate provided by Utility source for each project.	
305-6	Emissions of ozone-depleting substances (ODS)	Zero	ODS included in calculation
305-7	Nitrogen oxides, sulfur oxides, and other significant air emissions	Air emissions do not exceed local regulation air emission permit limits. Emission concentrations are tracked at local facilities; data is not calculated for global value.	
GRI 306: Effluents and Waste 2017			
306-1	Water discharge by quality and destination	Industrial water discharge is managed per local regulation. Discharge is monitored at local facilities; data is not calculated for global value.	
306-2	(a) Total weight of hazardous waste, with a breakdown by the following where applicable:		
	– Reuse	Included in recycle	
	– Recycle	3,799,503 kg	
	– Composting	N/A	
	– Recovery, including energy recovery	Included in recycle	
	– Incineration (mass burn)	N/A	
	– Deep well injection	N/A	
	– Landfill	N/A	
– On-site storage	N/A		

GRI Standard	Disclosure	Cross reference or Answer	Additional Notes
	– Other (to be specified by organization)	Hazardous waste disposal site: 6,345,210 kg	
	(b) Total weight of non-hazardous waste, with a breakdown by the following disposal methods where applicable: – Reuse	Included in recycle	
	– Recycling	9,719,278 kg	
	– Composting	N/A	
	– Recovering, including energy recovery	N/A	
	– Incineration (mass burn)	N/A	
	– Deep well injection	N/A	
	– Landfill	12,032,012 kg	
	– On-site storage	N/A	
	– Other	N/A	
	(c) How the waste disposal method has been determined	Information provided by the waste disposal contractor; organizational defaults of the waste disposal contractor	
306-3	Significant spills	None	
306-4	Hazardous waste transported	6,345,210 kg	
	Hazardous waste imported	Zero	
	Hazardous waste exported	Location and amount tracked at manufacturing facilities.	
	Hazardous waste treated	Location and amount tracked at manufacturing facilities.	
	Percentage of hazardous waste shipped internationally	N/A	
	Standards, methodologies and assumptions used	N/A	
306-5	Water bodies affected by water discharges and/or runoff	Not evaluated	
GRI 307: Environmental Compliance 2017			
307-1	Non-compliance with environmental laws and regulations	None of significant value	
GRI 308: Supplier Environmental Assessment 2017			
308-1	New suppliers that were screened using environmental criteria	New suppliers are not pre-screened using environmental criteria. However, all suppliers are provided ON Semiconductor's Corporate Social Responsibility Statement of Commitment through ON Semiconductor's Supplier Handbook . Furthermore top suppliers by spend are required to sign ON Semiconductor's Corporate Social Responsibility Statement of Conformance and complete a risk assessment with environmental criteria every other year.	
308-2	Negative environmental impacts in the supply chain and actions taken	ON Semiconductor is not aware of any negative environmental impacts in the supply chain for 2017.	
GRI 401: Employment 2017			
401-1	New employee hires by age group, gender and region	Age Under 30 years: 5,197 30 – 50 years: 2,179 50+ years: 244 Gender: M – 3,982; F – 3,638 Region: Americas: 695 Asia: 6,247 EMEA: 678	

GRI Standard	Disclosure	Cross reference or Answer	Additional Notes
	Employee turnover by age group, gender and region	Age: Under 30 years: 1,450 30 – 50 years: 1,270 50+ years: 396 Gender: M – 1,807 ; F – 1,324 Region: Americas: 435 Asia: 2,397 EMEA: 299	15 (0.5%) cases of turnover by age are unavailable for 2017.

405-2	Ratio of basic salary and remuneration of women to men	N/A	ON Semiconductor does not publicly disclose this information.
GRI 406: Non-Discrimination 2017			
406-1	Incidents of discrimination and corrective actions taken	None known	
GRI 407 – 409: Freedom of Association and Collective Bargaining, Child Labor and Forced Labor 2017			
407-1 – 409-1	Operations and suppliers in which the right of freedom of association and collective bargaining may be at risk; operations and suppliers at significant risk of incidents of child labor; operations and suppliers at significant risk of incidents of forced labor.	ON Semiconductor works with suppliers in countries where the risk of violating labor and human standards is recognized as being higher. To actively address this, ON Semiconductor requires suppliers to complete self-assessment questionnaires, provides training and also conducts on-site verification. In the event that any risk of violating the right to freedom of association, existence of child labor or forced labor is identified, ON Semiconductor works closely and diligently with its suppliers through corrective action plans. If the nonconformance is not adequately addressed by the supplier in a timely fashion, ON Semiconductor may choose to terminate its contract with the supplier. For more information on the company's management systems related to child labor and forced labor please see page 34 of the company's 2017 Corporate Social Responsibility Report .	
GRI 410: Security Practices 2017			
410-1	Security personnel trained in human rights policies or procedures	ON Semiconductor uses both in-house and third party organizations for security personnel. Approximately 90% of security personnel are trained in the company's human rights policies.	
GRI 411: Rights of indigenous Peoples 2017			
411-1	Incidents of violations involving rights of indigenous peoples	To the best of ON Semiconductor's knowledge there have been no identified incidents of violations involving the rights of indigenous peoples during the reporting period.	
GRI 412: Human Rights Assessments 2017			
412-1	Operations that have been subject to human rights reviews or impact assessments	ON Semiconductor manufacturing sites are subject to corporate internal and RBA Valid Audit Process (VAP) audits. The audit criteria pertaining to labor and health and safety cover human rights topics.	
412-2	Employee training on human rights policies and procedures	100%	
412-3	Significant investment agreements and contracts that include human rights clauses or that underwent human rights screening	Contracts with suppliers contain terms and conditions related to human rights, such as forced and indentured labor and equal employment opportunity. The company's master service agreements also contain terms and conditions related to the RBA Code of Conduct.	

GRI Standard	Disclosure	Cross reference or Answer	Additional Notes
GRI 413: Local Communities 2017			
413-1	Operations with local community engagement, impact assessments, and development programs	All ON Semiconductor sites globally are involved with community engagement and development programs through the company's workplace giving program and employee volunteerism. To learn more about the company's community engagement efforts, please see the Our Community section of the company's 2017 Corporate Social Responsibility Report .	
413-2	Operations with significant actual and potential negative impacts on local communities	None	
GRI 414: Supplier Social Assessment 2017			
414-1	New suppliers that were screened using social criteria	New suppliers are not pre-screened against social criteria. However, all suppliers are provided ON Semiconductor's Supplier Handbook which references the company's Corporate Social Responsibility Statement of Commitment . Furthermore top suppliers by spend are required to sign ON Semiconductor's Corporate Social Responsibility Statement of Conformance and complete a risk assessment with social criteria every other year.	
414-2	Negative social impacts in the supply chain and actions taken	ON Semiconductor works closely and diligently with its suppliers. If negative social impacts are identified within the company's supply chain, ON Semiconductor works with its suppliers to address those issues through corrective action plans.	
GRI 415: Public Policy 2017			
415-1	Political contributions	None	
GRI 416: Customer Health and Safety 2017			
416-1	Assessment of health and safety impacts of product and service categories	Over 95% of ON Semiconductor products are available in lead-free (Pb-free) packaging. ON Semiconductor also supports the aim of REACH in improving the protection of human health and the environment through better and earlier identification of the intrinsic property of chemical substances. ON Semiconductor meets REACH requirements and is committed to provide customers with information about substances in their products according to REACH requirements.	
416-2	Incidents of non-compliance concerning the health and safety impacts of products and services	ON Semiconductor is not aware of any non-compliance concerning the health and safety impacts of their products and services.	
GRI 417: Marketing and Labeling 2017			
417-1	Requirements for product and service information and labeling: (a) The sourcing of components of product or service	Not required	
	(b) Content, particularly with regard to substances that might produce an environmental or social impact	Per labeling requirements of JEDEC standard JESD97, all shipping labels show whether or not the products are Restriction on Hazardous Substances (RoHS) compliant/Pb-free. ON Semiconductor labeling also indicates information regarding hazardous material to comply with the China RoHS directive.	
	(c) Safe use of the product or service	Not required	
	(d) Disposal of the product and environmental or social impacts	Not required	
	Percentage of significant product or service categories by and assessed for compliance with such procedures.	N/A	The company does not evaluate this metric.
417-2	Incidents of non-compliance concerning product and service information and labeling	To the best of ON Semiconductor's knowledge the company has not received fines for non-compliance concerning product and service information and labeling.	
417-3	Incidents of non-compliance concerning marketing communication	ON Semiconductor is not aware of any non-compliance concerning marketing communication.	

GRI Standard	Disclosure	Cross reference or Answer	Additional Notes
GRI 418: Customer Privacy 2017			
418-1	Substantiated complaints concerning breaches of customer privacy and losses of customer data	ON Semiconductor is not aware of any such substantiated complaints.	
GRI 419: Socioeconomic Compliance 2017			
419-1	Non-compliance with laws and regulations in the social and economic area	To the best of ON Semiconductor's knowledge the company has not received significant fines or non-monetary sanctions for non-compliance with laws or regulations in the social or economic areas.
