

ON Semiconductor®

To: Our Valued Customers, Sales Representatives and Distributors
Date: July 31, 2021
Subject: ON Semiconductor Business Update Related to COVID-19 Pandemic

Dear valued customer:

Due to a surge in COVID-19 cases, both the Vietnam and Thailand governments and their agencies have increased restrictive measures for the public and businesses, with the objective to stop the gathering and movement of people in order to significantly slow down the spread of the virus within communities. Above all, our company prioritizes the safety of our employees under all circumstances. We are doing everything in our power to mitigate the impact of the limitations for our customers, working to ensure the on-time delivery of products.

Currently, the lockdown in and around Ho Chi Minh City is drastically affecting our manufacturing capabilities at our Vietnam assembly test facility. We have had to reduce operations significantly to comply with government restrictions and are working closely with the government on possible mitigation measures. We hope to be able to expand operations as soon as allowed and safely possible.

Please continue to work with your customer service representative to receive up-to-date delivery information on your current order. We will continue to update you regarding this force majeure event as circumstances evolve. You may also contact us through continuity@onsemi.com. We are currently assessing production and distribution delays.

Regards,
