

Industrial Relay Replacement & Motor Protection

Innovation

Showcasing eFuse as replacement of traditional fuses as well as relays for industrial automation applications with inbuilt overcurrent, overvoltage, inrush current and over temperature protection in a smaller footprint with faster response and no SOA concerns.

Block Diagrams

Value Proposition

All the protection features along with programmability as well as fault reporting capability ensures unconditional safety with no SOA concerns.

- ✓ Unconditional safety
- ✓ Programmability
- ✓ Ultra fast response to faults
- ✓ Fault reporting and diagnostics
- ✓ Easy installation
- ✓ Small footprint
- ✓ Ability to synchronize or sequence power up/down
